

# Pelton Park Natural Resources Management Plan

Tara Kauffman, Natural Resources Manager  
Brad Phillips, Environmental Projects Coordinator  
(March 2012-Updated February 2019)

---

Erie MetroParks mission is to conserve natural resources while connecting the community with nature through education and exploration.

Located in Erie County, Pelton Park is a 20 acre park owned by Perkins TWP. and managed by Erie MetroParks since 1991. Surrounded by residential and commercial development, this park contains several distinct ecological zones including forest; two small successional meadows, a small riparian corridor and a shallow wetland. A .3 mile looped trail takes you through the forest that is primarily dominated by large mature oaks (*Quercus alba*, *Q. macrocarpa*, *Q. rubra*, and *Q. velutina*) along with mature Wild Black Cherry (*Prunus serotina*) and Shagbark Hickory (*Carya ovata*). Due to high development surrounding the property it is essential to keep this space in its natural state. Pelton Park is an ideal place for recreational activities such as walking, bird watching, wildlife viewing and picnicking.

Over 246 plant species have been identified at Pelton Park (*see attachment plants thru 2016*). Meadow plants grow in abundance and include Goldenrod (*Solidago canadensis*), Fleabane (*Erigeron philadelphicus*) and several types of grasses. Featured spring wildflowers include Harbinger of Spring (*Erigenia bulbosa*), Green Dragon (*Arisaema dracontium*), Purple Cress (*Cardamine douglasii*) and Wild Geranium (*Geranium maculatum*). A variety of wildlife makes this 20 acre lot their home. A pair of bald eagles (*Haliaeetus leucocephalus*) closely nests to the perimeter of the park and should be closely watched to insure no disturbance is present. 96 bird species have been found through 2016 (*see attachment birds thru 2016*).

A former ice skating area has reverted to wetland within the west portion, adding habitat diversity to the site. It does contain much Reed Canary Grass, (*Phalaris arundinacea*), which is invasive.

Several depressional pools (vernal pools) exist within Pelton Park. These pools slowly accumulate water over winter and into spring, creating breeding grounds for frogs and salamanders. The presence of American Elm (*Ulmus americana*), Green Ash (*Fraxinus*

# Pelton Park Natural Resources Management Plan

(March 2012-Updated February 2019)

---

*pennsylvanica*) and Spicebush (*Lindera benzoin*) around the pools suggest that these vernal pools have existed for many years. Drainage of this area is not necessary, pools that retain and slowly release rain water are beneficial to water quality overall by reducing stream sedimentation, filtering out pollutants, and reducing storm surge volume. However, complaints from an adjacent landowner persuaded Perkins Township to dig a short ditch on the northeast portion of the property.

Invasive species include Common Reed (*Phragmites australis*), which is located in a narrow patch east of the parking lot. Spraying has greatly curtailed this population. Others include Autumn Olive (*Elaeagnus umbellata*) in the meadows, and Japanese Honeysuckle (*Lonicera japonica*), Amur Honeysuckle (*Lonicera maackii*), Garlic Mustard (*Alliaria petiolata*) and Multiflora Rose (*Rosa multiflora*) in among the trees along with other species (*see attachment plants thru 2011*). Efforts will be made to control invasive plant species. These efforts will be a combination of manual removal and targeted use of herbicides.

Hemminger ditch flows through Pelton Park. The culvert carrying this flow under the trail needs periodic cleaning to remove debris build ups which can cause flooding. The entrance to the woodland and sections of the trail are affected and stay wet. Long term, it may be desirable to replace this culvert with a larger unit and raise the grade of the trail.

**Pelton Park**

# Birds of Pelton Park thru 2016

Tuesday, February 07, 2017

Species	PP
Canada Goose	Transient
Wood Duck	Resident?
Mallard Duck	Resident?
Blue Wing Teal	Migrant
Double-crested Cormorant	Transient
Great Blue Heron	Transient
Great Egret	Transient
Turkey Vulture	Resident nearby
Bald Eagle	Resident
Sharp-shinned Hawk	Transient
Cooper's Hawk	Resident
Red-tailed Hawk	Transient
Killdeer	Resident
American Woodcock	Resident?
Ring-billed Gull	Transient
Herring Gull	Transient
Great Black-backed Gull	Transient
Mourning Dove	Resident
Chimney Swift	Resident
Ruby-throated Hummingbird	Resident
Red-bellied Woodpecker	Resident
Yellow-bellied Sapsucker	Migrant
Downy Woodpecker	Resident
Hairy Woodpecker	Resident
Yellow-shafted Flicker	Resident
Eastern Wood Pewee	Resident
Willow Flycatcher	Resident?
Least Flycatcher	Spring Migrant
Eastern Phoebe	Resident
Great Crested Flycatcher	Spring Migrant
White-eyed Vireo	Migrant
Yellow Throated Vireo	Migrant
Warbling Vireo	Resident?

Species	PP
Red-eyed Vireo	Resident?
Blue Jay	Resident
American Crow	Transient
Purple Martin	Transient
Tree Swallow	Transient
Rough-winged Swallow	Transient
Bank Swallow	Transient
Barn Swallow	Resident
Black-capped Chickadee	Winter Visitor
Tufted Titmouse	Resident
Red-breasted Nuthatch	Winter Visitor
White-breasted Nuthatch	Resident
Brown Creeper	Migrant
Carolina Wren	Resident
House Wren	Resident
Golden-crowned Kinglet	Migrant
Ruby Crowned Kinglet	Migrant
Blue-gray Gnatcatcher	Resident?
Eastern Bluebird	Resident
Swainson's Thrush	Migrant
Hermit Thrush	Migrant
Wood Thrush	Resident
American Robin	Resident
Gray Catbird	Resident
Brown Thrasher	Resident
Starling	Resident
Cedar waxwing	Transient
Blue-winged Warbler	Resident?
Tennessee Warbler	Migrant
Yellow Warbler	Resident
Chestnut-sided Warbler	Migrant
Magnolia Warbler	Migrant
Black-throated Blue Warbler	Migrant
Yellow-rumped Warbler	Migrant
Black-throated Green Warbler	Migrant

Species	PP
Blackburnian Warbler	Migrant
